

History

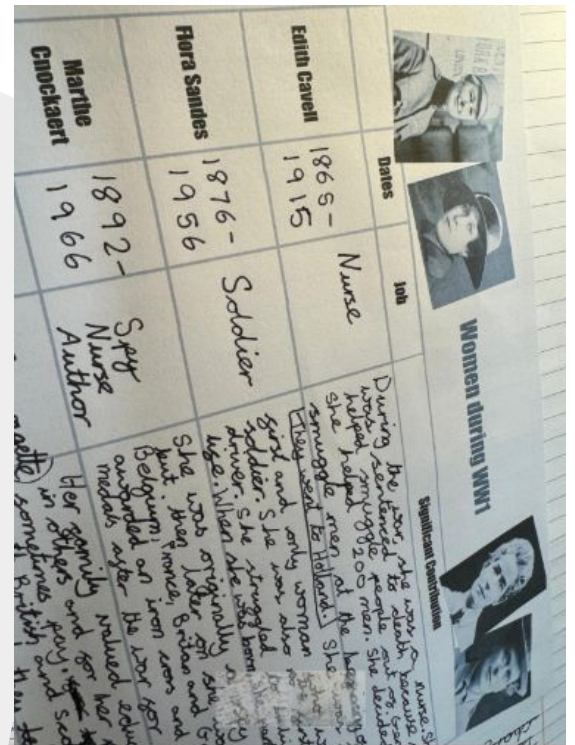

History learning has already begun in Years 3 and 6 this term and the children have loved learning about the Stone Age in Year 3 and WW1 in Year 6.

All British history is taught chronologically at St Andrew's so children get the clearest narrative of changes over time and how the country we live in today has come to be.

Year 3 have focused on the earliest civilisations (ancient history) and how hunter-gatherers became farmers and agriculture began.

Year 6 have enjoyed studying artifacts from WW1 (a modern period of history) which have inspired them to create amazing written work and learn more about the impact of the Great War on our society, particularly life in the trenches and the roles of significant women. We are super proud of all the beautiful writing they have produced and all the amazing knowledge they have learnt!

Having real life artefacts of War medals and letters from the front really inspired our children and they showed true compassion for the soldiers and their families when discussing how their lives changed.
