

In Design and Technology Year 3 explore eating seasonally look at designing wearable technology and have fun constructing a castle.

We closely evaluate our designs and finished products.

We discuss products we have made and can talk about how they work, what went well and things we could improve next time.

We work practically when developing our skills.

Year 4 explore pavilions, look at designing torches and have fun making slingshot cars.

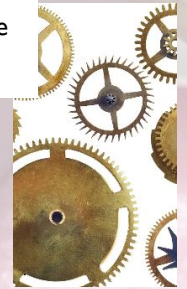

We use our knowledge from other curriculum subjects such as Computing and Science in our projects.

WHAT DOES DT LOOK LIKE?

We work collaboratively and independently on our Design and Technology projects.

We enjoy learning about how Design and Technology impacts the world around us.

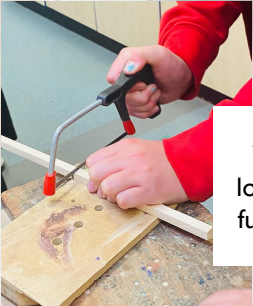

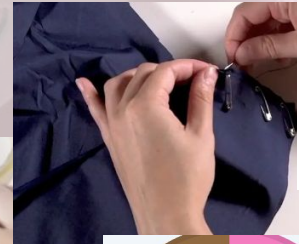

We work with real engineers and see how DT works in the 'real world'.

Year 5 explore gears and pulleys, look at designing doodlers and have fun developing and making a recipe.

Pupil voice interviews and questionnaires are used to gather pupil opinion.

Year 6 explore the digital world, look at designing playgrounds and have fun making waistcoats.
